Development Fund

JSTC is passionate about the environment and as a school we have taken steps to reduce our energy consumption, lowering our carbon emissions for our local community. We have invested in LED lighting across the whole site and we hope this will make a huge difference to the learning environment for our staff and students. The LED lighting is just the start of our sustainable journey and we hope to reduce our carbon footprint further in the coming years.

To help us invest in these energy saving measures, we are proud to announce that we have had grant funding from Smart Energy Greater Lincolnshire.

The £9.2 million Smart Energy programme has been part funded by the European Regional Development fund. This is enabling public buildings and small to medium businesses across the Greater Lincolnshire area invest in energy saving technology.

Without their support for this project it would not have been financially viable to undertake the volume of work across the whole school site.

Thank you Smart Energy Greater Lincolnshire, you have given our school community a bright and energy efficient future!
