

Text Messaging Service for Parents

As you may know (since you might have received a text on your mobile phone already), we are now using texts to contact parents.

Please note that the number which appears as the sender of the text is not the school's mobile number. Our service provider generates a new reply path, and a new number for texts every week.

This means that if you receive a text from us you will only be able to use the **Reply** function on your phone for 1 week. After that we will have been given a new number so your reply will not reach us. We apologise for any confusion that this causes, but we hope that the convenience and speed of receiving messages (and replying to them) by text will compensate for this.

Also, we apologise for the fact that our messages may seem terse – it is because we are limited to 160 characters.
